

Over 6 million last names were identified in the 2000 census. This list is just the names with 100 persons or more listed for each surname. Information is provided for 151,671 surnames, covering about 89.8 percent of the population. The first part of each segment line is the surname, the second is the sequence number and the last number is the number of people with that name. There is more information about each name that can be found in:
<http://www.census.gov/genealogy/www/names.zip>
