

The prime numbers ratios

The 11078738 prime numbers for all the numbers under 1,000,000,000 have a distribution ratio starting at almost 8% and dropping to 5.15% running and 4.88 for the block. The table below the first column is values for the block of 1,000,000 numbers ending with that number. The second column is the number of primes “78498” in that block followed by the running total from the beginning “78498”. The fourth column is the percent of primes of that block “7.85%” and the last column is running value “7.86%”, as you can see all the values do decrease. I was noticing there were about 5 prime numbers per each 100 numbers, well there are.

Block Numbers	Block primes	Running total	Block fractions	Running fractions
1000000	78498	78498	7.85%	7.85%
2000000	70434	148932	7.04%	7.45%
