

Here is a sample of two different solutions for each possible starting puzzle with one pegs removed. No two solutions from a group have the same moves, just in a different order. Use the board layout found at the top of the first column. Start the game by removing the peg mentioned in the first line of each solution. The jumps are much like in checkers. The direction of jumping is parallel to the three sides. The first number is the peg doing the jumping, the second number is jumped over and removed from the board. The third number is where the jumping peg lands. Make each of the moves as listed for that game. For this board layout there are solutions that will end up in the starting missing hole.
